Rewire Neuro, Inc. Wins TechFestNW

Biotech Start-up Awarded \$145,000 Investment in Pitch Competition

Portland, OR: Rewire Neuro, Inc. (“Rewire Neuro”) took home the first place prize at TechFestNW on May 21, 2021. [TechFestNW](#) featured over 90 companies from across the Pacific Northwest participating in a four-week workshop series discussing ways to grow and finance their businesses. Nine of these companies were then selected as finalists for the Angel Oregon Tech pitch competition and the opportunity to win a direct angel investment of \$145,000.

Dr. John Harkness, Rewire Neuro’s CEO and founder, presented the company and its artificial intelligent (AI) image analysis platform, [Pipsqueak Pro](#), to the panel of investors on Saturday, winning them over and taking home the angel investment prize.

Pipsqueak Pro uses advanced machine learning technology to rapidly detect specific biomarkers and dramatically improves the tedious analysis process through automated cellular detection and quantification.

About Rewire Neuro, Inc.: Rewire Neuro, Inc. develops and sells AI software for image analysis and cell detection. Founded in 2019 by Dr. John Harkness, Rewire Neuro is an emerging technology company based in Portland, Oregon applying novel AI & ML solutions to solve efficiency and human error problems within the biotech industry. Their mission is to make scientific discovery more accessible and efficient through the use of computer vision AI.
